Gabriele Amore

Full Stack Developer | End-to-End Software Delivery
Sydney | +61 494 764 416 | gabriele.amore.au@gmail.com | linkedin.com/in/gabriele-amore

Professional Summary

Full Stack Developer with 5+ years of commercial experience designing, developing and maintaining scalable web applications across Australian and international markets. Strong expertise in PHP, Laravel, TypeScript, Vue.js, PostgreSQL and MySQL, with experience delivering end-to-end solutions, integrating REST APIs, optimising databases and supporting AWS-hosted systems. Proactive in taking ownership of complex tasks, improving existing systems and leveraging AI-powered tools to enhance development efficiency and code quality.

Technical Skills

Backend: PHP, Laravel, REST APIs, third-party integrations, authentication
Frontend: TypeScript, Vue.js, HTML5, CSS3, Tailwind CSS, Bootstrap
AI Tools: AI-assisted development, ChatGPT, Claude, Cursor, Copilot
Databases: PostgreSQL, MySQL, MongoDB, database design, query optimisation, data modelling
OS: AWS Cloud Services, Linux\Ubuntu, deployment, WordPress (ACF), Shopify
Tools & Practices: Git, GitHub, GitLab, CI/CD, Agile, PHP Unit, Production Support

Professional Experience

Full Stack Web Developer - MedMate | *Melbourne, VIC (remote) · 2025*

Medmate is an Australian healthtech startup connecting patients nationwide with registered doctors, nurse practitioners and pharmacists via phone and video consultations.

- Optimised critical database workflows, reducing query execution time by over 30 seconds.
- Took ownership of technical improvements across four internal production portals, from problem analysis to implementation.
- Designed and delivered business-driven solutions, REST APIs and internal system integrations.
- Re-engineered reusable Vue.js components to improve maintainability and consistency.
- Enhanced WordPress platforms and supported AWS-hosted production environments.

  Tech Stack: PHP, Laravel, Vue.js, AngularJS, AWS, Wordpress, MySQL, REST APIs, Git, Agile.

Full Stack Web Developer - Charger Agency | *Sydney, NSW · 2024–2025*

Charger Agency is an Australian digital and branding agency that builds websites, digital platforms, and brand experiences for startups and established businesses.

- Led end-to-end delivery of 10+ commercial web projects, from initial requirements gathering and solution design through development, deployment and ongoing optimisation
- Partnered with clients and stakeholders to translate business requirements into scalable technical solutions and functional web applications.
- Designed full-stack applications integrating APIs, databases and user interfaces.
- Evaluated technical trade-offs and refined solutions through Agile delivery.
- Managed hosting, deployment and production performance.

  Tech Stack: PHP, Laravel, Vue.js, AWS, PostgreSQL, Wordpress, REST APIs, Git, Agile.

Project Manager / Full Stack Web Developer - Training4U | *Turin, Italy · 2022–2024*

Training4U is an Italian software development company specialising in digital solutions for the veterinary industry, building management platforms and applications that streamline clinical and business operations.

- Architected and developed VetsGo, a SaaS management platform designed to streamline the day-to-day operations of veterinary clinics.
- Designed and implemented a multi-level data versioning and archival strategy, separating historical records from active data to reduce main-table volume, improve query performance and maintain data history.
- Re-engineered complex PostgreSQL database schemas to support evolving business requirements, improve data accessibility and enhance maintainability.
- Designed backend architecture, REST APIs, third-party integrations and business logic, delivering features from requirements gathering to production deployment.
- Coordinated a multidisciplinary team of backend developers, frontend developers, designers and business operations staff.

  Tech Stack: Laravel, Vue.js, AWS, PostgreSQL, REST APIs, Git, Agile.

Full Stack Web Developer - Eroi Solutions | *Turin, Italy · 2021–2022*

- Delivered full-stack solutions for Convengo.it using Laravel, Vue.js and MySQL.

Full Stack Web Developer - Boolean | *Turin, Italy · 2020–2021*

- Built full-stack web applications using PHP, Laravel, Vue.js and MySQL.

Education

Bachelor of Information Technology
· Greenwich Higher Education, Sydney, NSW | In progress (expected 2029)

Engineering studies
· University of Turin, Italy (not completed)

Certifications

Angular - Kineticon S.r.l. (2023)

Microsoft Excel Intermediate - Kineticon S.r.l. (2023)
